

TWINNING PROJET ABSTRACT

“Support for capacity building of the Constitutional Court”

Kingdom of Morocco

Beneficiary Authority: Constitutional Court (Cour Constitutionnelle)

This twinning project falls within the framework of the **Technical Cooperation Facility (TCF) – Morocco**, under decision no. **NDICI-GEO-NEAR/2022/ACT-61040**, and will be implemented under **indirect management with the Moroccan authorities**. It belongs to the **"Constitutional justice"** sector. The main objective of this twinning is to support the **Constitutional Court** in strengthening the rule of law in Morocco by consolidating the role of the Constitutional Court as an independent, efficient and accessible institution, in compliance with European and international standards.

The project aims to optimize the functioning of the Court, modernize its tools and strengthen its contribution to the consolidation of the rule of law in Morocco, while establishing a process of institutional and jurisdictional rapprochement between the Constitutional Court of the Kingdom and its European counterparts, all in line with the objectives of institutional reform of the Kingdom.

The project consists of three main components:

- **Institutional strengthening**, by the strengthening of the general organization of the Constitutional Court and the improvement of its static and dynamic structure.
- **Capacities strengthening**, with a focus on strengthening judicial capacities (members) and assistance capacities (legal advisers, registry). This component also aims to develop guides and reference materials of good practices aligned with European standards and national contextualization.
- **Communication**, particularly by strengthening the anchoring of the Constitutional Court in the public and institutional landscape through the improvement of its internal and external communication policy.

The components will be implemented through studies (analyses, reviews, benchmarking, diagnoses, evaluations, and so on), surveys, trainings, study tours, round tables, seminars, etc.

The **maximum EU budget** allocated for this project amounts to **EUR 1 000 000**. The deadline for submission of the twinning proposals to the Contracting Authority by the National Contact Points is **Tuesday, 10 February 2026** and the expected start date of implementation is **15th of June 2026**. The duration of the project is 24 months.
