

DECIDED BY SIDA'S GENERAL DIRECTOR 2017-06-13

In June 2017 the Director General of Sida decided on a new Environmental Action plan for 2017–2020. The plan builds on the Environment Policy and describes what should be achieved, when and by whom. This document highlights key targets in the action plan.

KEY ENVIRONMENTAL TARGETS FOR SIDA'S WORK AS ANALYST, FINANCIER AND DIALOGUE PARTNER

- By 2020 Sida has increased the share of funding with environment as principal objective to 15 % and environment as significant objective to 45 %
- By 2020 Sida has increased the share of funding to climate change ("climate financing") to 28 %
- By 2020 Sida has increased the share of funding where biodiversity is a principal objective to 4 % and biodiversity as significant objective to 15 %
- By 2020 Sida has increased the number of guarantees where environment is a principal objective to 8 guarantees, with a volume of at least 3 billion SEK
- Environment/climate change is a strategic priority in Sida's operational planning and follow up
- Environment/climate analysis permeates routines and guidelines for development of strategies and their operationalization
- Adequate environment/climate assessment is made for all contributions during planning, appraisal and performance monitoring. See Sida's Green Tool Box
- Sida is an established and recognized actor in international fora
- By 2020, Sida has ensured that the concept of "green economy" permeates work in productive sectors

- Where relevant Sida sets environmental requirements in its own procurements
- Results and lessons learned from working on environment/climate are externally communicated
- Information about Sida's environmental work is continuously updated and available for all staff
- Ongoing capacity development of all staff. By 2018 all staff should have received basic training on environment/climate and/or unit/department specific training

KEY ENVIRONMENTAL TARGETS FOR SIDA'S WORK ON A GREEN OFFICE

- By 2020 CO₂ emissions from travelling per full time staff/year are reduced by 15 % through smarter travelling and continuously increased use of other forms of meetings
- By 2020 energy use per square meter has been reduced by 15 %

Please note that the Environmental action plan also includes a range of Department specific targets owned by the Departments for Operational Support, Management Support and HR and Communication etc.
